Available for **student work** and **contracting** during weekdays after school, weekends, holidays, and flexible hours.

Interests & Motivation

I have a strong interest in technology and enjoy learning more about how systems and devices work in practice. My interest in IT goes beyond school, as I like to stay informed about new technologies and improve my technical skills whenever possible.

In my free time, I am actively involved in sports such as football and going to the gym, which has helped me develop discipline, teamwork, and perseverance. I am also interested in cars and automotive technology, as it combines technical understanding with practical application.

I am motivated to work alongside my studies in order to gain real-world experience, improve my professional skills, and better prepare myself for future studies and career opportunities. I am open to working in different fields, as I value learning, responsibility, and personal development.
